Scientific organization

Abstract

"The 6th EISCSA congress in Saint-Etienne, Rhône Alpes, is a great opportunity to share the state-of-the-art in applied and basic sciences dealing with sport, exercise and health. Scientists, medical doctors, physiotherapists, athletic coaches and industry will discuss from their point of view, how to "Return to active life" for injured athletes as well as in sedentary, elderly and disabled conditions. So the University of Saint Etienne and the Sparaltec cluster for sport industry welcome you in the new congress hall located at the former Manufacture Cycle Manufactory for an active congress including outstanding scientific and social programs."

Pr A.BELLI, LPE

"Les Journées Stéphanoises d'isocinétisme (JSI), inaugurées en 2008, ont pour objectif d'apporter aux professionnels de santé une information simple et concrète sur les principes de l'isocinétisme, son application en prévention et rééducation et d'autre part, de rassembler des professionnels utilisateurs de l'isocinétisme pour des discussions plus approfondies. Le thème de cette 4^{ème} JSI, en association avec le congrès international de l'EISCSA, sera « Retour à la Vie Active ! », et tentera d'apporter des réponses sur la place et l'utilisation de l'isocinétisme en rééducation et réhabilitation dans les contextes pathologiques.

Dr P.EDOUARD (MD), MPR - Dr F.DEGACHE, IFRH, LPE

Topics

Active life in :

- Chronic pathologies
- Neuromuscular diseases
- Elderly population
- Disabled population
- Sports injury

EISCSA State-of-the-Art session

Deficit related strategies in walking and running
At every congress EISCSA focuses on one topic of special interest within a so called State-of-the-Art session. In this session an overview of literature and recent stand will be provided. Additionally, a thematic poster presentation takes place, where physiotherapists, scientists, medical doctors, athletic coaches and representatives from industry put emphasis on different points of view. Finally, a detailed discussion including EISCSA members, experts and the audience will close the session. After the congress a position stand paper will be published in "Isokinetics and Exercise Science".
